

Welding Helmet with Adjustable Headband

This welding helmet provides essential eye and face protection during welding operations. Constructed from durable, heat-resistant materials, it shields the user from sparks, spatter, and harmful radiation emitted during welding processes.

Product Overview

Professional Welding Protection

The HM402 welding helmet is designed to provide essential eye and face protection during intensive welding operations. Constructed from durable, heat-resistant materials, it effectively shields the user from sparks, spatter, and harmful radiation. Its lightweight, ergonomic design includes an adjustable headband to ensure a secure, comfortable fit, reducing fatigue during extended periods of use.

Key Features

Design & Ergonomics

- Lightweight construction for reduced neck and shoulder strain
- Adjustable headband for a secure, customized fit
- Flip-up lens holder for quick workpiece inspection
- Heat-resistant material composition

Protection Capabilities

Spark Protection, Spatter Shielding, Radiation Protection

Usage

Suitable For

Professional Welding • Hobbyist Welding • Various Welding Applications
