

Welding Helmet with Dark Shade Filter

This welding helmet offers essential eye and face protection during welding. Constructed from impact-resistant plastic, it features a viewing window with a dark shade filter and ensures adequate ventilation.

Overview

Professional Protection

The JS-WH15 welding helmet is engineered to provide essential eye and face protection during demanding welding operations. Constructed from durable, impact-resistant plastic, it offers a lightweight and comfortable fit for extended use. The integrated viewing window features a dark shade filter designed to shield the welder's eyes from harmful radiation and sparks, while the optimized design ensures adequate ventilation and minimizes fogging.

Technical Specifications

Usability Features

- Lightweight design
- Anti-fogging ventilation
- Dark shade filter window

Material	Impact-resistant plastic
Key Protection Features	Eye Protection, Face Protection, Radiation Shielding, Spark Resistance
