

Welding Jacket with Heat Protection

This welding jacket offers superior protection and comfort during welding. Constructed from durable, heat-resistant materials, it shields against sparks, spatter, and heat.

Overview

Professional Welding Protection

This welding jacket is engineered to provide superior protection and comfort during demanding welding operations. Constructed from durable, heat-resistant materials, it offers comprehensive coverage against sparks, spatter, and intense heat. The design includes practical features such as a stand-up collar, adjustable cuffs, and a secure button-front closure, ensuring a reliable fit for professional environments.

Compliance & Certification

Safety Standards	CE, EN ISO 11611:2007
