

Welding Lens Filter

This green-tinted welding glass protects eyes from radiation and sparks. It maintains visibility while ensuring safety during welding.

Product Overview

Professional Eye Protection

These welding lens filters are specifically engineered to provide essential eye protection for professionals during welding and cutting operations. Each unit is strictly CE approved to ensure compliance with safety standards in industrial and educational environments. The lenses are available in multiple dimensions to accommodate various welding helmet and goggle configurations, ensuring a secure and reliable fit.
