

Welding Lens for Eye Protection

Welding lenses are designed to offer optimal eye safety during welding tasks. These shade lenses filter ultraviolet and infrared radiation, as well as intense visible light.

Product Overview

Professional Welding Eye Protection

These high-quality welding lenses are designed to provide superior eye protection during welding and cutting operations. Each lens is engineered to effectively filter harmful UV and IR radiation while maintaining optimal visibility. With a wide range of available shade levels and dimensions, these glasses offer the versatility required for various industrial welding tasks.

Technical Specifications

Available Shade Levels

- 4
- 5
- 6
- 7
- 8
- 9
- 10
- 11
- 12
- 13
- 14

Common Dimensions

Length (mm)	Width (mm)
51	108
75	98
90	110

Compliance & Quality

Intended Use

Welding • Cutting • Training Courses

Certifications

CE Approved
