

Welding Machine Cable

These welding machine cables facilitate connection between welding machines and welding holders. The cables adhere to GB5013.6-1997 standards.

Product Overview

Professional Welding Machine Cable

This high-performance rubber-sheathed cable is designed specifically for secure connections between welding machines and welding holders. It complies with GB5013.6-1997 standards, ensuring reliable technical performance for industrial welding applications. Available in both standard rubber-sheathed (YH) and chloroprene rubber-sheathed (YHF) variants, these cables are built to withstand rigorous operating conditions.

Technical Specifications

AC Withstand Voltage

1000 V

Voltage

5 min

Duration

Cable Components

- Conductor
- Insulation layer
- Sheath

Standards Compliance

GB5013.6-1997, 245 IEC 81 (YH), 245 IEC 82 (YHF)

Dimensions and Weight

Cable Dimensions and Weight Table

Nominal Area (mm ²)	Outer Diameter (mm)	Weight (kg/km)
16	11	251
25	12	329
35	13	414
50	15	568
70	17	759
95	20	1040
