

Welding Power Generator

The welding power generator combines welding functionality with electrical power generation. Its robust engine ensures reliable performance for welding tasks and powering equipment, featuring multiple outlets and welding output terminals.

Product Overview

Versatile Welding Power Solution

This high-performance gasoline-powered welding generator is designed for professionals requiring a dual-purpose tool for both arc welding and power generation. Combining a 420F engine with robust output capabilities, it ensures stability and reliability on remote job sites or in emergency power scenarios. Featuring intuitive controls and a durable frame, this unit is engineered to deliver consistent results under demanding conditions.

Technical Specifications

Welding Performance

220 A

Max Welding Current

Generator Power Output

6 KW

Rated Power

6.5 KW

Max Power

Engine Type

420F Gasoline Engine

Operational Features

Control Features

- Precision current control knob
- Real-time voltmeter monitoring
- Clearly marked welder terminals
- Integrated circuit protection fuse

Power Connectivity

Dual AC Power Outlets, Welder Terminals

Construction & Design

Build Quality

Robust Frame • Portable Design • High Durability
