

Wet and Dry Abrasive Paper

This abrasive paper is designed for both wet and dry sanding applications. It is used for polishing metal molds, carbon fiber, fiberglass, composite materials, and precision instruments.

Product Overview

Versatile Abrasive Solution

The AP37 series is a professional-grade abrasive paper engineered for both wet and dry sanding environments. Featuring a high-quality Cwt latex paper backing with anti-curl technology, it ensures long usage life and consistent performance on demanding materials. This paper is specifically optimized for polishing and finishing metal molds, carbon fiber, fiberglass, composite materials, and precision instruments.

Technical Specifications

Product Forms

Sheet • Roll • Belt • Disc

Abrasive Grain	Aluminum Oxide
Backing Type	Cwt Latex Paper
Bonding	Resin over Resin
Available Grit Sizes	80, 100, 120, 150, 180, 220, 240, 280, 320, 360, 400, 500, 600, 800, 1000, 1200, 1500, 2000

Logistics and Dimensions

Packaging Configurations

Format	Quantity
Bale (Specific Grit)	100
Carton (Standard Sheet)	500
Carton (Bulk)	1000

Standard Sheet Size	230mm x 280mm
