

Wet and Dry Abrasive Paper

This abrasive paper is suitable for both wet and dry sanding. It is designed with an electro-coated surface for consistent sanding performance on wood, metal, plastic and painted surfaces.

Product Overview

Professional Abrasive Solution

This superior quality abrasive paper is specifically engineered for versatile performance in both wet and dry sanding environments. Featuring a high-performance electro-coated surface, it ensures consistent material removal and exceptional durability across various substrates. The integrated latex backing offers enhanced flexibility and resistance to tearing, making it an ideal choice for tasks ranging from heavy stock removal to precision fine finishing on wood, metal, plastic, and painted surfaces.

Technical Specifications

Sheet Dimensions	230 x 280mm (9 x 11 inches)
Grit Options Available	P120

Packaging Information

Packaging Details

Level	Quantity
Inner Packing (Sheets per pack)	100
Outer Packing (Packs per carton)	10

Product Features

Performance Attributes

- Electro-coated abrasive surface
- Wet and dry application compatibility
- Latex backing for high flexibility
- Tear-resistant construction

Applications

Suitable Surfaces

Wood • Metal • Plastic • Painted Surfaces
