Overview

Versatile Cleaning Performance

This robust barrel vacuum cleaner is engineered for both wet and dry applications, making it an essential tool for commercial and workshop environments. It features a durable metal barrel and an antibacterial hose to ensure hygiene and longevity. With powerful suction, blowing capabilities, and advanced safety features like overheat protection and electrostatic shielding, it provides a comprehensive cleaning solution for demanding spaces.

Performance

Vacuum Degree	17 Kpa
Noise Level	80 dB
Power Consumption	1400 W

Technical Details

Dirt Loading Capacity	18 L
Voltage/Frequency	220-240V~50/60Hz
Cord Length	4.5 M

Features

Safety Protections

- Overheat protection (at >150°C)
- Electrostatic protection
- Antibacterial hose

Usability Features

- Automatic thread winding
- Omni-directional wheels
- Multi-brush head attachments
- Durable metal barrel

Cleaning Modes

Wet Suction, Dry Suction, Blowing Function
