

Wet and Dry Vacuum Cleaner Filter

High-efficiency filter net designed for wet and dry vacuum cleaners. The cylindrical filter features a pleated design with a white filtration medium, encased in a durable red plastic frame.

Overview

Professional Wet & Dry Cleaning Performance

This high-performance wet and dry vacuum cleaner is engineered for versatile cleaning tasks in demanding environments. Equipped with a powerful 1200W motor and a generous 40L metal bucket capacity, it efficiently handles both liquid spills and dry debris. The unit includes integrated features such as a blower function and a power tool socket, making it an essential tool for workshops and professional maintenance.
