

# Wet Core Drill Bit for Concrete and Masonry

This general-purpose blade offers a long service life and versatile cutting performance on materials like brick, block, concrete, masonry and stone. It can be manufactured with alternate arbor sizes upon request.

## Product Overview

### Professional Wet Core Drilling Performance

This general-purpose wet core drill bit is engineered for precision drilling in demanding construction materials including concrete, block, masonry, stone, and brick. Featuring durable diamond-tipped segments, it ensures a long service life and high cutting efficiency when paired with water-fed core drilling equipment. The robust steel body and integrated water-flow slots facilitate effective debris removal and cooling for consistent professional results.

## Technical Specifications

Compatible Materials	Concrete, Masonry, Brick, Block, Stone
Cooling Requirement	Wet application required
Segment Attachment	Brazed diamond segments
Customization Options	Yes
Arbor Availability	Other sizes available on request
