

Wet Cutting Blade - DC302 Series

This high-performance cutting blade is designed for wet cutting applications. It features durable construction and precision engineering for clean and efficient cuts.

Product Overview

High-Performance Wet Cutting Solution

The DC302 Series is a high-performance cutting blade engineered specifically for wet cutting applications. Its durable construction and precision engineering ensure clean, efficient, and reliable cuts across various industrial and machinery settings. Designed for demanding material processing tasks, this blade provides the stability and accuracy required for professional-grade results.

Technical Specifications

Application Type	Wet Cutting
Series Model	DC302
Key Attributes	High-Performance, Durable Construction, Precision Engineered, Industrial Grade
