

Wet Sandpaper for Automotive and Metal Finishing

This sandpaper is designed for wet sanding applications, providing a durable backing and abrasive grit for smooth finishes. It is ideal for automotive, woodworking, and metalworking, offering flexibility and resistance to clogging for efficient material removal.

Product Overview

Professional Grade Wet Sanding Solution

This high-quality wet sandpaper is engineered for precision finishing in demanding automotive and metalworking environments. It features a durable, flexible backing that resists clogging, ensuring consistent material removal and a superior surface texture. Designed for versatile use, it is the ideal choice for professionals seeking reliable performance during surface preparation and final finishing stages.

Technical Specifications

Performance Features

- Optimized for wet sanding applications
- Durable and flexible backing material
- High resistance to abrasive clogging
- Consistent grain distribution for uniform finish

Country of Origin

China

Suitable Applications

Automotive, Metalworking, Woodworking, Surface Preparation
