

WF10x/20 Microscope Eyepieces

These microscope eyepieces offer 10x magnification with a field number of 20mm. They are constructed with high-quality optical glass, providing clear and sharp images for detailed specimen examination.

Overview

High-Quality Optical Eyepieces

These WF10x/20 microscope eyepieces are designed to enhance your microscopy experience by providing a 10x magnification and a wide 20mm field of view. Constructed with high-quality optical glass, they ensure clear, sharp, and detailed observation of specimens. They are an essential, reliable component for a wide range of standard microscopy applications.

Optical Specifications

Magnification	10 x
Field Number	20 mm
Eyepiece Type	Wide Field (WF)

Construction

Material
High-Quality Optical Glass

Compatibility

Application	Standard Microscopes, Laboratory Use, Specimen Examination
