

WF15X/16 Wide-Field Microscope Eyepieces

These WF15X/16 eyepieces provide 15x magnification with a 16mm field number. They are designed for use with standard microscopes to enhance image clarity and field of view.

Product Overview

Wide-Field Viewing Experience

The WF15X/16 Wide-Field Microscope Eyepieces are precision-engineered to enhance your microscopy workflow. With a 15x magnification power and a 16mm field number, these eyepieces provide a significantly broader and clearer viewing area compared to standard optics. Designed for compatibility with standard microscope systems, they are an essential upgrade for professionals seeking improved clarity and ease of observation.
