Product Overview

Professional Flour Milling Solution

This wheat flour milling line is designed for high-efficiency production, offering a compact footprint combined with low-noise operation and energy efficiency. It integrates comprehensive cleaning, milling, and automated packaging systems to ensure consistent flour quality and maximum yield. With an intuitive PLC-based control system and robust construction, it provides a sanitary and reliable solution suitable for small-capacity commercial operations.

Technical Specifications

Daily Capacity

5 T/24H

Min Capacity

18 T/24H

Max Capacity

Compatible Raw Materials

Maize/Corn, Wheat, Sorghum, Soy, Dried Chili, Dried Bananas, Dried Cassava

Performance Data

Processing Efficiency

Material	Product Rate	Fineness Mesh
Maize/Corn	75%-85%	60-120
Wheat	75%	60-120
Sorghum/Soy	75%	60-120
Dried Fruit/Veg	100%	40-80

System Features

Control & Automation

- Programmable Logical Controller (PLC)
- Fault self-diagnosis system
- Automatic alarm notifications
- Automated packing and sewing
- Schneider electrical components

Processing Stages

Cleaning, Breaking, Reduction, Semolina production, Fine flour production

Packaging

Bagging Specifications

1-5kg, 2.5-10kg, 20-25kg, 30-50kg
