Overview

High-Efficiency Harvesting Solution

This advanced harvester is engineered for superior threshing and cleaning performance in diverse agricultural conditions. It features a versatile, multi-crop design capable of harvesting wheat, rice, corn, and rape through modular component adjustments. Designed for operator productivity, the machine integrates intelligent monitoring systems and a vibration-dampened cab to ensure comfort and operational reliability.

Performance Metrics

Supported Crops	Wheat, Rice, Corn, Rape
-----------------	-------------------------

Technical Specifications

Transmission Type	Synchronizer shift gearbox
Cleaning Mechanism	Widened cleaning chamber with secondary rethreshing

Operator Comfort

Cabin Amenities

- Overall-suspension cab design
- Noise and vibration reduction
- Advanced sealing
- Optional air conditioning

Intelligence & Safety

Intelligent Systems

- Automatic stubble height detection
- Cleaning loss monitoring
- Loss detection alarm system
