

Wheel Bearing and Clutch Release Bearing

Tensioner bearings and belt pulley clutch release bearings are designed for optimal performance. These bearings withstand high loads, provide smooth operation, and ensure efficient power transfer.

Product Overview

High-Performance Automotive Bearings

This collection features premium-grade wheel bearings and clutch release bearings designed for exceptional durability and smooth operation in a wide array of automotive applications. Engineered to withstand significant loads, these components provide reliable power transfer, reduced friction, and precise fitment across multiple vehicle platforms. These bearings are essential for maintaining optimal vehicle handling, safety, and long-term mechanical efficiency.

Compatibility

Compatible Makes

Alfa Romeo, Audi, BMW, BUICK, CHEVROLET, Chrysler, CITROEN, DAEWOO, DAI-HATSU, DODGE, FIAT, Ford, Honda, ISUZU, Iveco, HINO, Renault, JEEP, KIA, LADA, LAND ROVER, MAZDA, MERCEDES-Benz, MITSUBISHI, Nissan, OPEL, MAN, SCANIA, PEUGEOT, SUBARU, SKODA, SUZUKI, Volkswagen, Toyota, Volvo

Product Specifications

Available Types

- Wheel Bearings
- Clutch Release Bearings
- Tensioner Bearings
- Belt Pulley Bearings

Vehicle Categories

Passenger Cars • Trucks • Tractors
