Product Overview

High-Performance Wheel Hub Assembly

This precision-engineered wheel hub assembly is designed for optimal performance, durability, and reliable vehicle handling. Crafted from high-grade bearing steel, the component ensures smooth wheel rotation and meets rigorous quality standards. It is built for a direct fit, facilitating easy installation and providing excellent resistance to wear and corrosion for an extended service life.

Technical Specifications

Model Number	ZXY series
Material	Bearing steel
Outer Dimension	200 mm
Separated	Unseparated

Compatibility

OEM Part Numbers	15871427, 22679995, 22702690, 22703043, 28473AG00A, 28473AG00B, 28473AG01A
