

Wheel Loader

This wheel loader features a turbo air filter that removes over 90% of dust and impurities, reducing engine wear and fuel consumption. Its radiator fan is directly engine driven, providing strong efficient cooling, and it offers a low cycle time of 8.6 seconds for efficient loading.

Overview

High-Performance Wheel Loader

This wheel loader is engineered for demanding construction and material handling tasks, offering a robust design for maximum productivity. Equipped with a powerful engine, it delivers high breakout force and responsive hydraulic control for efficient operation in diverse environments. The machine features a durable frame and reliable powertrain, ensuring long-term performance and minimal downtime for professional operators.

Performance Metrics

Key Performance Indicators

10600 kg

Operating Weight

93.5 kN

Breakout Force

1.7 m³

Bucket Capacity

Engine Specifications

Gross Power	92 kW
Net Power	87 kW
Rated Speed	2200 rpm

Dimensions

Standard Dump Clearance	2911 mm
