

Wheel Loader Middle Motion Shaft

This middle motion shaft is designed for use in 936 wheel loaders. It transmits power from the transmission to the axle.

Product Overview

High-Performance Motion Shaft

This middle motion shaft is engineered specifically for 936 wheel loader applications, serving as a critical component for power transmission. Constructed from high-strength steel, it is precision-machined to withstand the high torque and rotational speeds required in demanding earthmoving environments. This part ensures reliable performance and durability, making it an essential replacement for maintaining your machinery's operational efficiency.

Technical Details

Part Number	2050900053
Compatible Equipment	936 Wheel Loader

Quality & Standards

Certifications

CE • ISO

Warranty & Support

- 6 months warranty for main spare parts
- 100% compensation for incorrect parts
- 100% compensation for damage caused by poor packaging
- Lifetime after-sales service
