

Wheel Loader Output Flange Assembly

This output flange assembly is designed for use in wheel loaders. It transmits power from the transmission to the axle.

Product Overview

Precision Drivetrain Component

This output flange assembly is a critical drivetrain component engineered for heavy-duty wheel loaders. Designed for durability and reliable power transmission, it facilitates the transfer of torque from the transmission system to the axle. Built to withstand demanding construction environments, this assembly ensures optimal performance and machine uptime.

Technical Details

Part Number	29050021541
Equipment Compatibility	Wheel Loader

Quality & Compliance

Certifications

CE • ISO

Warranty

6 months for main spare parts

Service & Logistics

Service Standards

- Pre-shipment inspection with photo/video documentation
- Export standard packaging
- Fast delivery options
- 100% compensation for shipping errors or damage
