

Wheel Tractor for Agricultural Applications

This wheel tractor is designed for agricultural applications. It is equipped with a cabin, heavy-duty tires, a powerful engine, and front and rear attachments for plowing, tilling, and other field operations.

Product Overview

Robust Agricultural Utility

This wheel tractor is engineered specifically for demanding agricultural environments, combining high engine power with superior traction capabilities. Designed with operator ergonomics in mind, the fully enclosed cabin ensures comfort during long hours in the field. It features versatile mounting options including front-end attachments and a rear hitch, allowing for seamless integration with a variety of farming implements for plowing and tilling operations.

Performance

Primary Field Operations

Plowing, Tilling, Field Preparation

Technical Specifications

Design Features

- Enclosed operator cabin for weather protection
- Heavy-duty tires for enhanced grip and traction
- Versatile front-end attachment interface
- Standard rear hitch for implement coupling
