

Wheeled Canister Vacuum Cleaner with Wand and Floor Nozzle

This vacuum cleaner has a wheeled canister design connected to a wand and floor nozzle via a flexible hose. It is electrically powered and intended for household use.

Product Overview

Efficient Cleaning Performance

This compact wheeled canister vacuum cleaner is engineered for efficient dirt and debris pickup across various household surfaces. The system features an integrated motor and filtration housed within a mobile canister, connected to a versatile wand and floor nozzle. Designed for ease of use and extended reach, this vacuum provides a practical solution for maintaining cleanliness in residential environments.
