

Wheeled Excavator for Earthmoving

This wheeled excavator is designed for digging and earthmoving tasks. Its robust design and hydraulic arm make it suitable for heavy-duty applications on construction sites.

Overview

Versatile Wheeled Excavator

This wheeled excavator is designed for efficient earthmoving and excavation tasks in construction and landscaping environments. Its wheeled chassis provides excellent mobility across job sites, allowing for quick repositioning between tasks. The robust hydraulic arm and bucket attachment ensure reliable performance for heavy-duty engineering projects.

Technical Specifications

Model Identifier	900
------------------	-----

Key Features

Design Type	Wheeled Chassis, Hydraulic System, Earthmoving
