

Wheeled Excavator

This wheel excavator is designed for various construction and excavation tasks. Its wheeled design allows easy maneuverability on different terrains, making it suitable for urban and rural construction sites.

Overview

Versatile Wheel Excavator JYL621E

The JYL621E is a versatile wheel excavator engineered for diverse construction and excavation environments. Its wheeled design provides superior maneuverability across both urban and rural job sites, while the high-performance hydraulic system ensures efficient digging and material handling. Designed for durability and operator comfort, this machine represents a reliable and cost-effective asset for heavy-duty excavation tasks.
