

Wheeled Twin-Cylinder Air Compressor for Spraying Equipment

This compressor is designed for spraying machinery and spreading equipment. It features a horizontal tank, twin cylinders, and is mounted on wheels for portability.

Overview

Industrial-Grade Compressed Air Solution

This wheeled twin-cylinder air compressor is engineered specifically for professional spraying and spreading machinery applications. Its robust design features a horizontal tank configuration and dual cylinders, ensuring consistent air delivery and high performance. The integrated wheel assembly provides excellent mobility, allowing for seamless transport across varied industrial environments.

Technical Specifications

Design Type	Horizontal Twin-Cylinder
Portability	Yes
Primary Applications	Spraying Machinery, Spreading Equipment, Industrial Air Supply

Performance Features

Construction

Robust Build • High Durability
