Product Overview

Professional Polishing Performance

This high-density white foam polishing pad is engineered for machine polishing, providing uniform pressure distribution and efficient material removal. Designed with a flat surface, it effectively minimizes heat buildup through its open-cell foam structure. It is an ideal solution for achieving a high-gloss, swirl-free finish on automotive paint, metals, and plastics.

Physical Properties

Surface Design	Flat
Foam Type	Open-cell high-density foam

Compatibility & Usage

Compatibility

- Standard polishing machines
- Various polishing compounds
- Diverse backing plates

Typical Applications	Automotive detailing, Woodworking, Metal polishing, Plastic finishing
Attachment System	Hook and loop

Compliance & Quality

Certifications

ISO9001:2000 • SGS Certified
