

White Powder Coated Hydronic Towel Radiator

This hydronic towel radiator features a white powder coating and is EN442 compliant. Designed for bathroom use, it provides efficient heating and ample space for drying towels.

Product Overview

Efficient Hydronic Heating

This hydronic towel radiator is engineered for both efficient bathroom heating and practical towel drying. Featuring a durable white powder coating, it offers excellent corrosion resistance and a sleek, modern aesthetic. The ladder-style design maximizes hanging space, while the system ensures consistent and energy-efficient performance for residential or commercial bathrooms.
