

Wi-Fi Bluetooth LED Smart Bulb

This smart bulb combines energy-efficient LED technology with wireless connectivity, allowing for remote control and automation of lighting. Featuring both Wi-Fi and Bluetooth capabilities, it can be easily integrated into existing smart home ecosystems.

Product Overview

Smart Lighting Performance

This advanced LED smart bulb integrates both Wi-Fi and Bluetooth connectivity to ensure stable, reliable performance in any environment. Designed with direct-connect technology, the bulb pairs seamlessly with voice assistants for quick, simplified setup without connection drops. It offers highly efficient lighting control, making it a sustainable and cost-effective choice for modern automated spaces.

Connectivity

Key Connectivity Features

- Direct-connect technology
- Voice assistant integration
- Mesh signal stability

Connection Modes

Wi-Fi, Bluetooth

Technical Specifications

Performance Benefits

Energy Efficient • Long Lifespan • Cost-Effective
