

Wi-Fi Enabled Motion Sensor with Remote Control

This is a Wi-Fi-enabled motion sensor that includes remote control functionality. The wire-free sensor is app-based and features an alarm exceeding 90dB.

Product Overview

Smart Wi-Fi Motion Detection System

This advanced indoor motion sensor offers a wire-free, easy-to-install security solution for modern environments. Utilizing integrated Wi-Fi technology, it connects directly to a mobile application to provide real-time alerts upon motion detection. The system features a built-in siren for immediate audible deterrence and includes a remote control for convenient arming and disarming.

Technical Specifications

Alarm Volume

90 dB
Siren Loudness

App Support

Tuya App

Connectivity

Wi-Fi

Primary Functions

Motion Detection, App-Based Monitoring, Remote Control Operation, Low Voltage Indicator

Installation

Wire-free / Cable-free
