

Wi-Fi Enabled Spotlight Surveillance Camera

This camera features infrared and spotlight technology, offering three night vision modes. The settings can be adjusted to achieve full color night vision.

Product Overview

Versatile Security Monitoring

The Wi-Fi Enabled Spotlight Surveillance Camera is a robust security solution designed for both indoor and outdoor environments. Featuring 2MP high-definition video, built-in two-way audio, and advanced night vision modes, it provides comprehensive coverage and active deterrence through light and sound alarms. With flexible storage options and remote monitoring via smartphone or PC, it is an ideal choice for property owners seeking reliable, real-time security management.
