Product Overview

Smart Power Management

This Wi-Fi enabled smart power socket provides advanced control and monitoring capabilities for your home or office devices. With integrated energy tracking and smartphone app compatibility, users can easily manage power consumption, schedule timers, and control appliances remotely. Designed for the European market, it ensures seamless integration into modern smart home ecosystems.

Technical Specifications

Voltage	230 VAC
Frequency	50 Hz

Connectivity

Wi-Fi Frequency	2.4 GHz
Wireless Standard	IEEE802.11b/g/n
Security Protocols	OPEN, WEP, WPA-PSK, WPA2-PSK

Operating Environment

Usage Environment	Indoor Only
Operating Temperature	0 to +40 °C

Features

Key Features

- Energy Monitoring
- Timer Function
- Countdown Function
- Voice Control Support

Software Support

Supported Languages

English, German, French, Italian
