

WiFi Enabled Video Door Phone System

This WiFi-enabled video door phone system enhances security and convenience for residential and commercial properties. The system includes a high-resolution outdoor camera unit with two-way audio and an indoor handset for answering calls and unlocking the door.

Product Overview

Smart Connectivity for Enhanced Security

This WiFi-enabled video door phone system offers a sophisticated security solution for residential and commercial environments. By integrating a high-resolution camera with mobile app connectivity, it allows users to monitor their entrance, communicate with visitors, and unlock doors remotely from anywhere. The system supports multi-indoor unit configurations and wireless intercom functionality, providing a seamless and secure communication experience.

Connectivity & Features
