Product Overview

Smart Power Management

This versatile WiFi smart power socket enables seamless remote control of household and office electrical appliances via smartphone or tablet. Designed for compatibility with major smart home ecosystems, it supports features like automated timer settings, countdown functions, and real-time status tracking. Its robust IP44-rated construction ensures safe operation, making it an ideal choice for enhancing energy efficiency and home automation.

Technical Specifications

Performance Metrics

230 VAC

Voltage

16 A

Max Load

3600 W

Max Power

Connectivity Standards

- WiFi 2.4GHz
- IEEE802.11b/g/n
- Remote control via 3G/4G/WiFi

Features & Compatibility

Key Functionality

- Device sharing
- Timer settings
- Countdown timer
- Status tracking
- Remote manual control

Smart Home Platforms

Amazon Alexa, Google Home, Tuya App
