

Winch Block with Storage Bag

This heavy-duty block is designed for winching applications. It features durable construction with a high load capacity and includes a protective storage bag.

Product Overview

Heavy-Duty Offroad Winch Block

This heavy-duty offroad block is engineered for demanding winching applications, providing reliable performance and high load capacity. Designed for versatility, it is compatible with both wire rope and synthetic rope systems across various winch types. Each unit includes a durable protective storage bag, ensuring the equipment remains clean, organized, and shielded from the elements during transport and storage.
