

Window Air Conditioner Unit

This air conditioner unit is designed for window installation. It features adjustable controls for temperature and fan speed, suitable for cooling smaller spaces.

Product Overview

Compact Cooling Solution

This window-type air conditioner is designed for efficient, space-saving cooling in smaller environments. Its compact white design integrates seamlessly into standard window frames, featuring intuitive controls for temperature and fan speed adjustments. The front grille ensures optimal air distribution while the side vents facilitate effective heat exhaust, providing a reliable cooling solution for professional use.
