

Window Air Conditioner with Electronic Controls

This window air conditioner has a modern design and a perforated front panel for optimal airflow. The unit features an electronic control panel with digital display for easy adjustments of temperature and mode.

Product Overview

High-Efficiency Window Air Conditioning

This window air conditioner offers a reliable solution for climate control with its dual-motor ultra-silent design, keeping noise levels under 43dB during sleep or low-speed operation. It is built for efficiency, achieving SEER12 ratings to help reduce energy consumption. The unit features a versatile wide air supply range and user-friendly electronic controls to maintain comfort in any environment.
