

Window Air Extractor Fan

This window air extractor fan is designed for efficient air extraction in residential and commercial spaces. It features adjustable louvers that allow directional control of airflow, enhancing ventilation effectiveness.

Product Overview

Professional Air Extraction Solution

The window ventilator is engineered for efficient air extraction in both residential and commercial environments. Constructed with durable materials and a streamlined design, this unit integrates seamlessly into window installations for discreet operation. It features a high-performance motor that balances optimal airflow with quiet performance, ensuring improved indoor air quality with minimal disturbance.

Technical Specifications

Installation Type	Window-mounted
Construction Material	Durable Plastic
Airflow Control	Adjustable Louvers, Directional Control, High-performance Motor

Maintenance

Maintenance

- Easy to install
- Simple maintenance requirements
