

Window-Mounted Air Conditioner

This window-mounted air conditioning unit is designed for cooling individual rooms. It features adjustable louvers for directing airflow and rotary knobs for controlling temperature and fan speed.

Product Overview

Compact Cooling Solution

This window-mounted air conditioning unit provides an efficient way to regulate room temperature in professional or residential spaces. Engineered with a compact profile, it integrates seamlessly into standard window frames for quick and easy installation. The unit features manual control options for precision air direction and cooling intensity, ensuring a comfortable environment.
