

Windshield Wiper Arm

This precision-engineered arm piece is designed for windshield wiper systems. Constructed from durable metal alloy, it offers enhanced longevity and reliable performance.

Overview

High-Performance Windshield Wiper Arm

This precision-engineered wiper arm piece is designed for automotive windshield systems, offering reliable performance in various weather conditions. Constructed from a durable metal alloy, it ensures enhanced longevity and resistance to wear. The robust pivot mechanism provides a smooth and efficient wiping action, making it an ideal high-quality replacement part for professional automotive applications.

Technical Specifications

Attachment Size

6 mm

Arm Piece Diameter

Material & Construction

Material	Durable Metal Alloy
Mechanism	Robust Pivot Mechanism

Application

Compatibility

- Various windshield wiper assemblies
- Automotive replacement systems
- High-quality repair applications

Key Features

Performance Benefits	Enhanced Longevity, Smooth Wiping Action, Precision Engineered, Corrosion Resistant
