

Wing Corkscrew with Bottle Opener

This is a wing-style corkscrew designed to remove corks from wine bottles. It features a metal construction, a worm, lever wings, and a bottle opener.

Product Overview

Professional Wing Corkscrew

This durable wing corkscrew, often referred to as a butterfly corkscrew, is engineered for efficient wine bottle cork extraction. Its dual-lever mechanism provides the leverage necessary to remove corks with minimal effort, making it an essential tool for restaurant and bar environments. The integrated bottle opener at the top adds multi-functionality, while the ergonomic handles ensure a comfortable and secure grip during use.
