

Winged Corkscrew with Blue Accents

This winged corkscrew, also known as a butterfly corkscrew, uses levers to assist in removing corks. The model features a metal frame with blue accents on the handle grips, gear covers, and bottle rest.

Product Overview

Professional Winged Corkscrew

This winged corkscrew, also known as a butterfly corkscrew, is designed for efficient and effortless wine bottle opening. Featuring a durable metal frame, the tool utilizes a dual-lever mechanism that rises as the screw is inserted, allowing the user to simply push down the wings to leverage the cork out. The ergonomic design includes blue-accented handle grips and a stable bottle rest, making it a reliable addition to any professional bar or restaurant environment.
