Product Overview

Premium Winter Performance

This 11R24.5 winter truck and bus radial tire is engineered for exceptional safety and reliability in harsh, cold-weather environments. Featuring an advanced compound formula and a specialized three-groove, four-block tread pattern, it delivers superior grip on snow and ice. Designed for durability with a four-layer belt structure, this tire ensures long-lasting wear resistance for commercial applications in demanding climates like North America.

Technical Specifications

Max Load Single

3550 kg
Maximum Load

7826 lbs
Maximum Load

Tire Size	11R24.5
Load Index/Ply Rating	148/145-12PR
