

Wire Cutter and Stripper Tool

This 2-in-1 tool is designed for efficiently cutting and stripping wires. It features durable construction with precision cutting blades and comfortable, ergonomic handles.

Product Overview

Professional Wire Cutter and Stripper

This 2-in-1 tool is designed for efficient wire preparation, allowing users to catch, hold, and strip wires in a single motion. It features a self-adjusting stripping mechanism that eliminates the need to locate specific stripping holes, streamlining the workflow. With a full-flush, low-profile cutting head and induction-hardened stainless steel jaws, it offers both precision and durability for electronic applications.

Technical Specifications

Compatible Wire Range	26 AWG to 14 AWG
Jaw Material	Induction-hardened stainless steel
Recommended Use	Soft Copper Wire, Electronic Applications

Design Features

Cutting Head Profile Full-flush • Low-profile	
Stripping Mechanism	Yes
Operation Style	Self-adjusting
