

Wire Cutting and Stripping Machine

This high-precision machine is designed for cutting and stripping various wire types and sizes. It features adjustable cutting blades and stripping tools for accurate, consistent results.

Overview

High-Precision Wire Processing

The ZDBX-2 is a high-precision wire cutting and stripping machine engineered for versatility in both laboratory and industrial settings. It features an intuitive digital interface with programmable parameters to ensure consistent and accurate processing across diverse insulation materials. Built with safety and efficiency in mind, this machine offers an adaptable solution for automated wire preparation.

Technical Specifications

Programmable Parameters

- Cutting length
- Stripping length
- Wire diameter

Supported Insulation Types

PVC, Teflon, Silicone

Features

Machine Capabilities

High-Precision • Digital Control • Compact Design • Robust Construction

Safety

Safety Equipment

- Transparent safety cover
- Emergency stop button
