

Wire On Tube Evaporator

Wire on tube evaporators are used in refrigeration and heat exchange systems. The evaporators feature wire-on-tube and tube-on-plate designs.

Product Overview

Professional Grade Heat Exchange Solutions

This high-performance wire-on-tube evaporator is engineered for efficient thermal management in professional cooling systems. Designed for durability and consistent heat transfer, the unit supports various industrial and commercial refrigeration applications. The product features precision-engineered geometries, ensuring compatibility with rigorous technical requirements and standard installation layouts.
