

Wire Rope Clips / U-Bolt Clamps

These wire rope clips, also known as U-bolt clamps, are designed to secure the loose end of a wire rope or cable, creating a loop. They are suitable for rigging, lifting, and securing applications.

Product Overview

Wire Rope Clips and U-Bolt Clamps

These wire rope clips, also known as U-bolt clamps, are essential hardware components designed to secure the loose end of a wire rope or cable back to itself, forming a reliable loop. Engineered for rigging, lifting, and general securing applications, they provide a strong and durable termination point. The U-bolt design allows for straightforward installation and precise tightening, ensuring a secure connection suitable for various industrial environments.

Technical Specifications

Available Finishes

Galvanized • Painted

Key Design Features

- U-bolt design for secure clamping
- Adjustable tightening mechanism
- Versatile size range
- Corrosion-resistant finish options

Common Applications

Rigging, Lifting, Securing, Cable Termination
