

Wire Rope Sling with Thimble Eyes

This wire rope sling is made of braided steel cable, forming a closed loop. It features swaged metal sleeves securing thimble eyes at each end, reinforced with metal rings for added durability.

Product Overview

Professional Rigging Solution

This wire rope sling is engineered for heavy-duty lifting and rigging operations in demanding construction and industrial environments. Featuring reinforced thimble eyes at each end, the design minimizes wear and prevents cable deformation during heavy load cycles. It is fully compatible with cranes and professional lifting equipment, providing a reliable and durable solution for secure load handling.

Technical Construction

Design Features	Braided Steel Cable, Swaged Metal Sleeves, Reinforced Thimbles
Termination Type	Thimble Eyes

Application

Primary Applications

- Construction Lifting
- Industrial Rigging
- Crane Operations
